distronode

District AI by Distronode

The receptionist on your Distronode business line.

Works with Microsoft 365: Microsoft Entra ID sign-in, Outlook calendar booking, Outlook contacts.

Bought on Microsoft Marketplace or from a CSP partner.

The challenge

Growing businesses that cannot leave the phone unanswered.

After hours and at busy times, a missed call is a missed client.

Who it is for

Professional services

(law, accounting, consulting, agencies)

Books the meeting on your Outlook calendar, or transfers to the named person the caller asked for.

Healthcare clinics

(dental, physiotherapy, medical offices)

Books the appointment while the caller is on the line, in English or Canadian French.

Real estate and property

(brokerages, property managers)

Answers after hours and at busy times, and books showings and viewings on your calendar.

Sizes From one line and one person, to a growing team, to agencies and multi-location companies.

What District AI does on every call

1

The phone rings

One call, start to finish, with nothing left for you to type up afterward.

2

It answers

Every call is picked up live, day or night, in a natural voice that sounds nothing like a phone menu.

3

It books

It checks your calendar availability and books the appointment while the caller is still on the line.

4

It logs

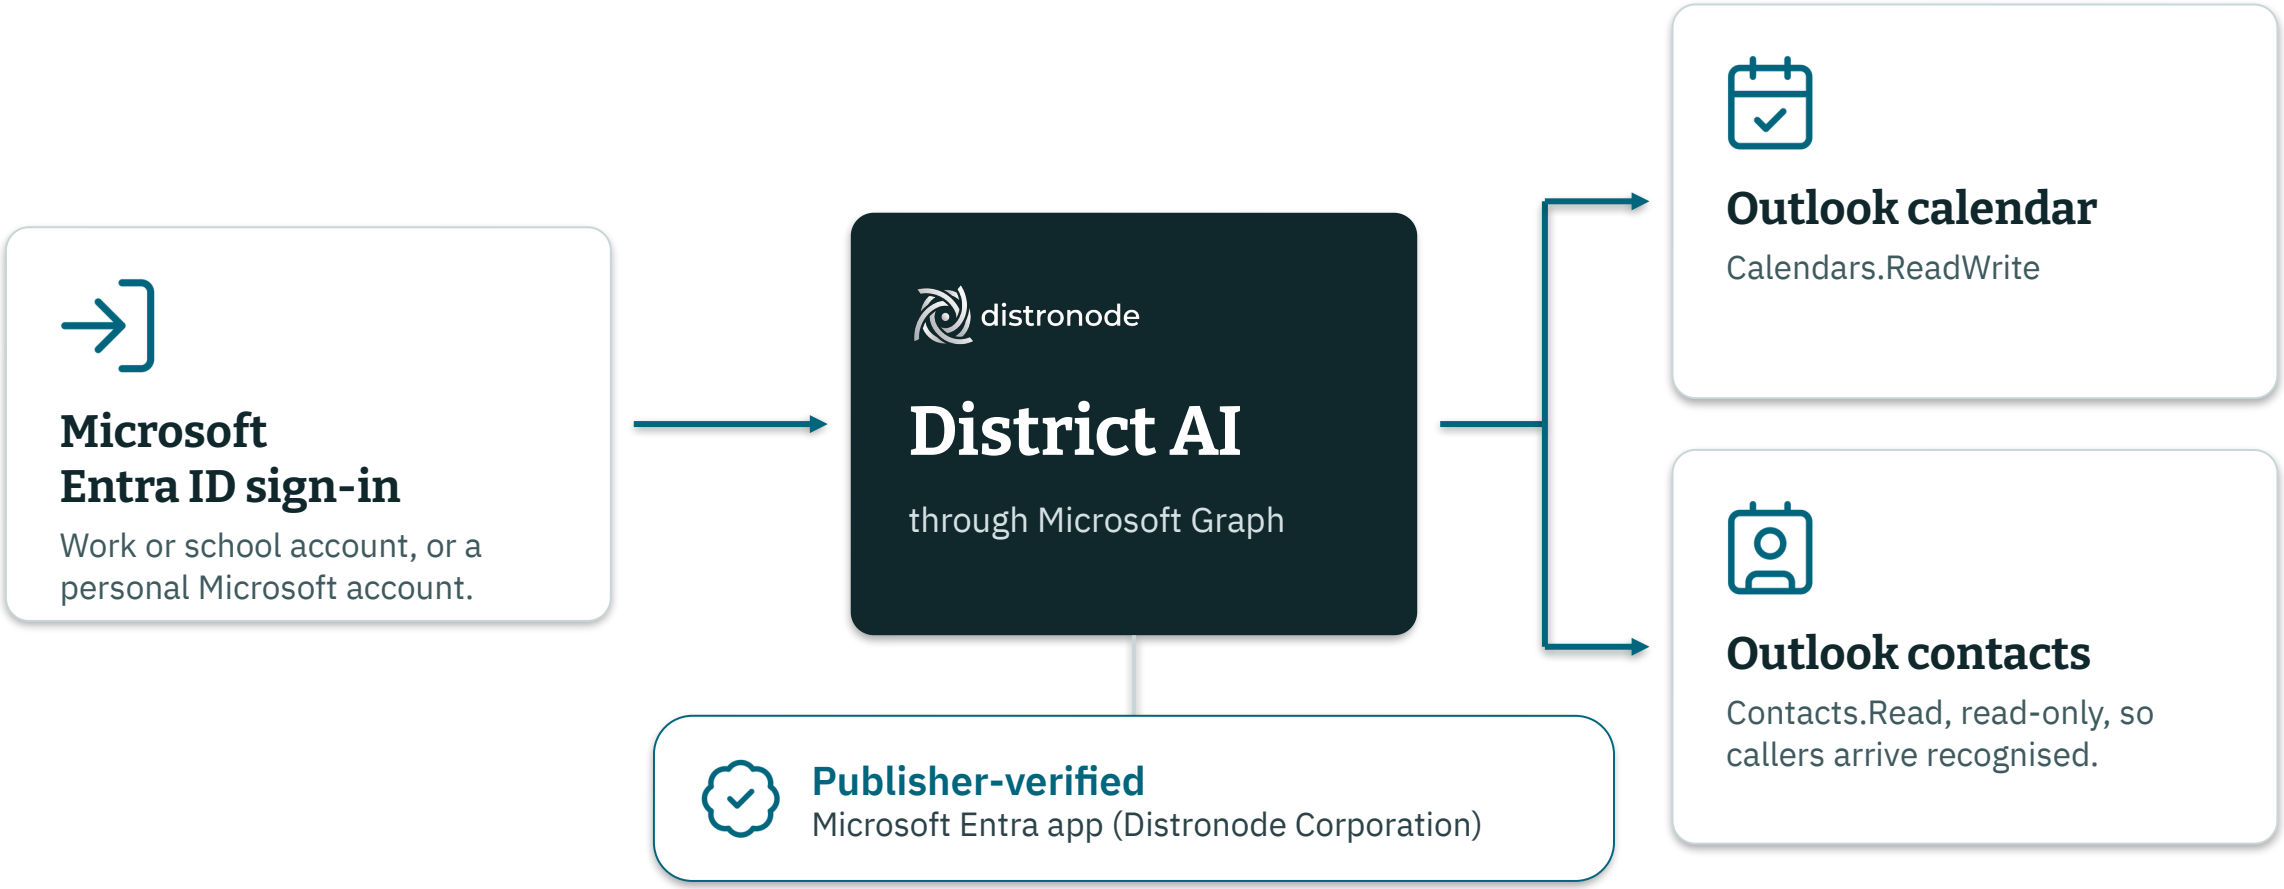

Name, number, what they asked for, and a full transcript land in your dashboard as soon as the call ends.

Answers with the greeting you wrote and approved.

Takes a message, or transfers to a named person instead of guessing.

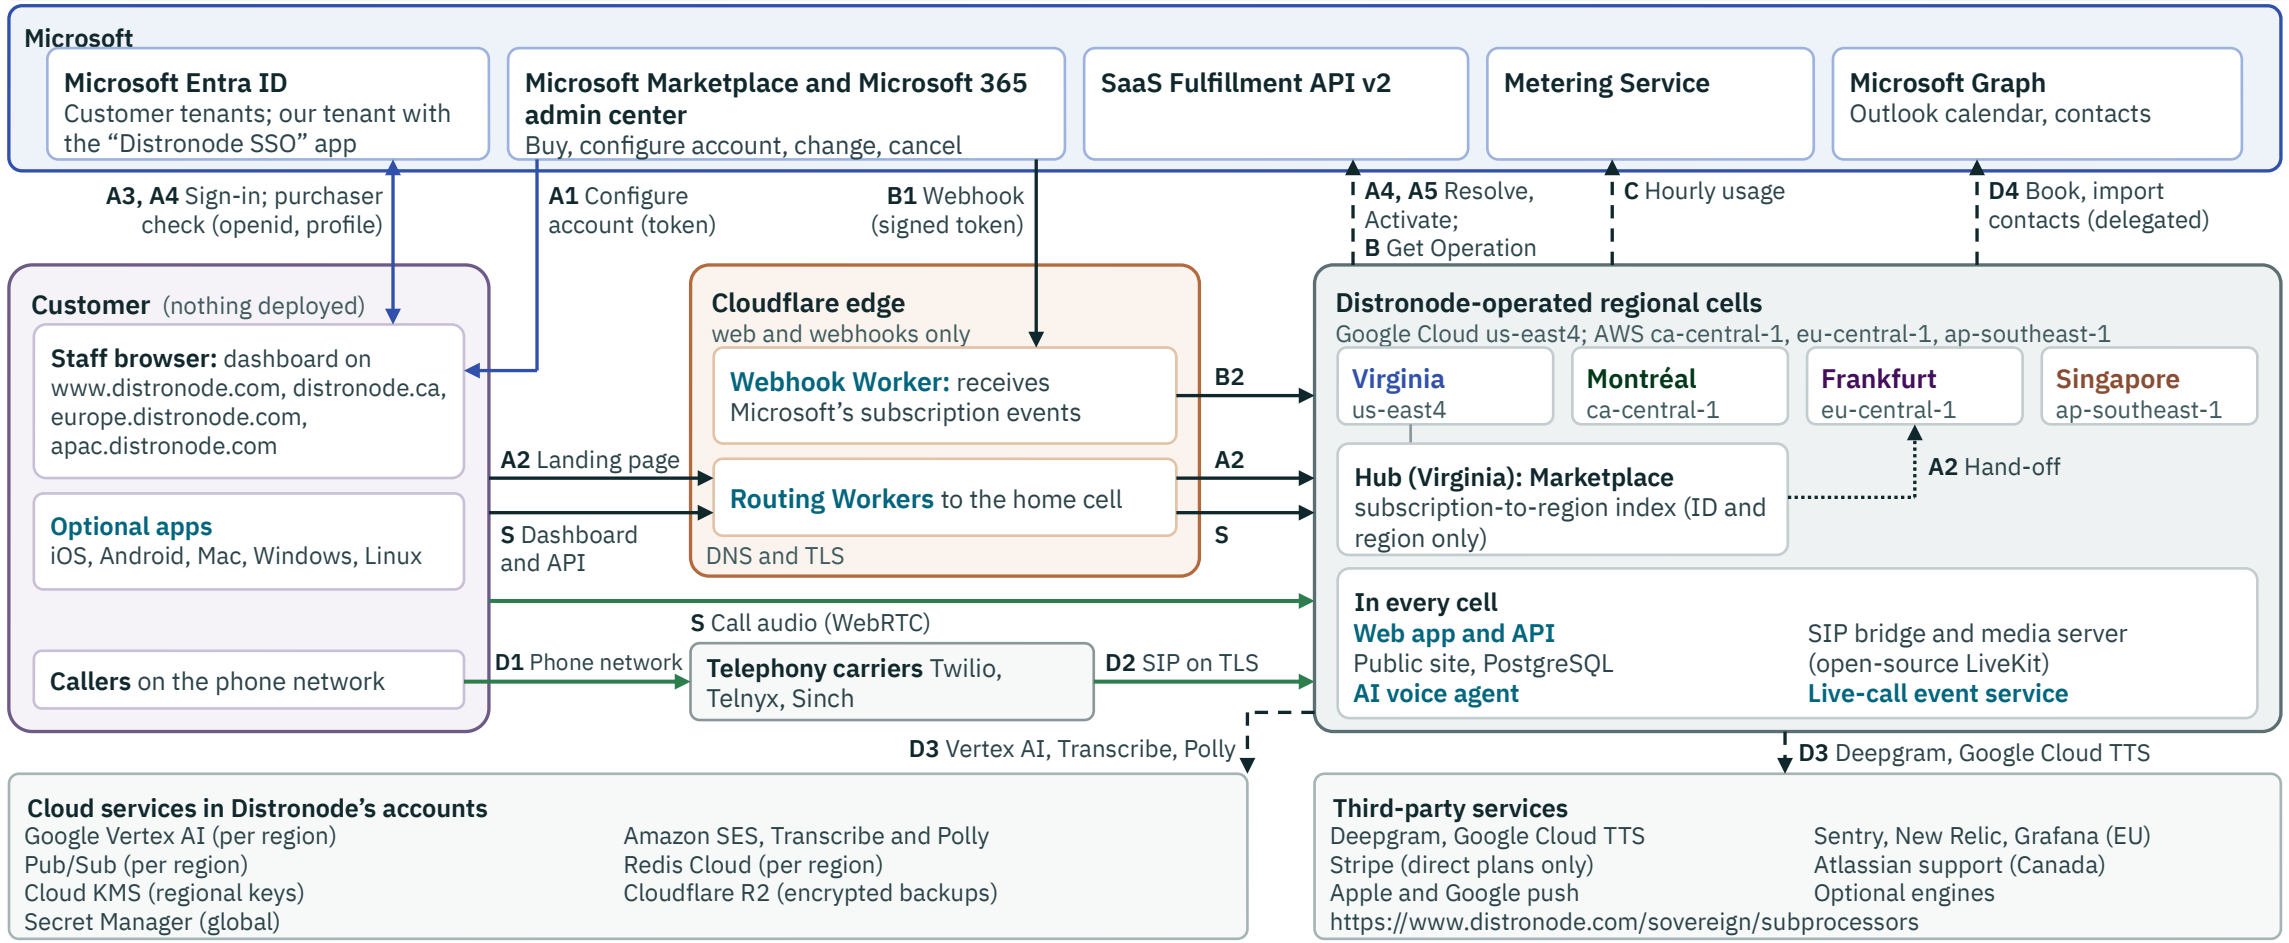

English and Canadian French, plus Spanish, German, Dutch and Italian.

How it works with Microsoft 365

Reference architecture

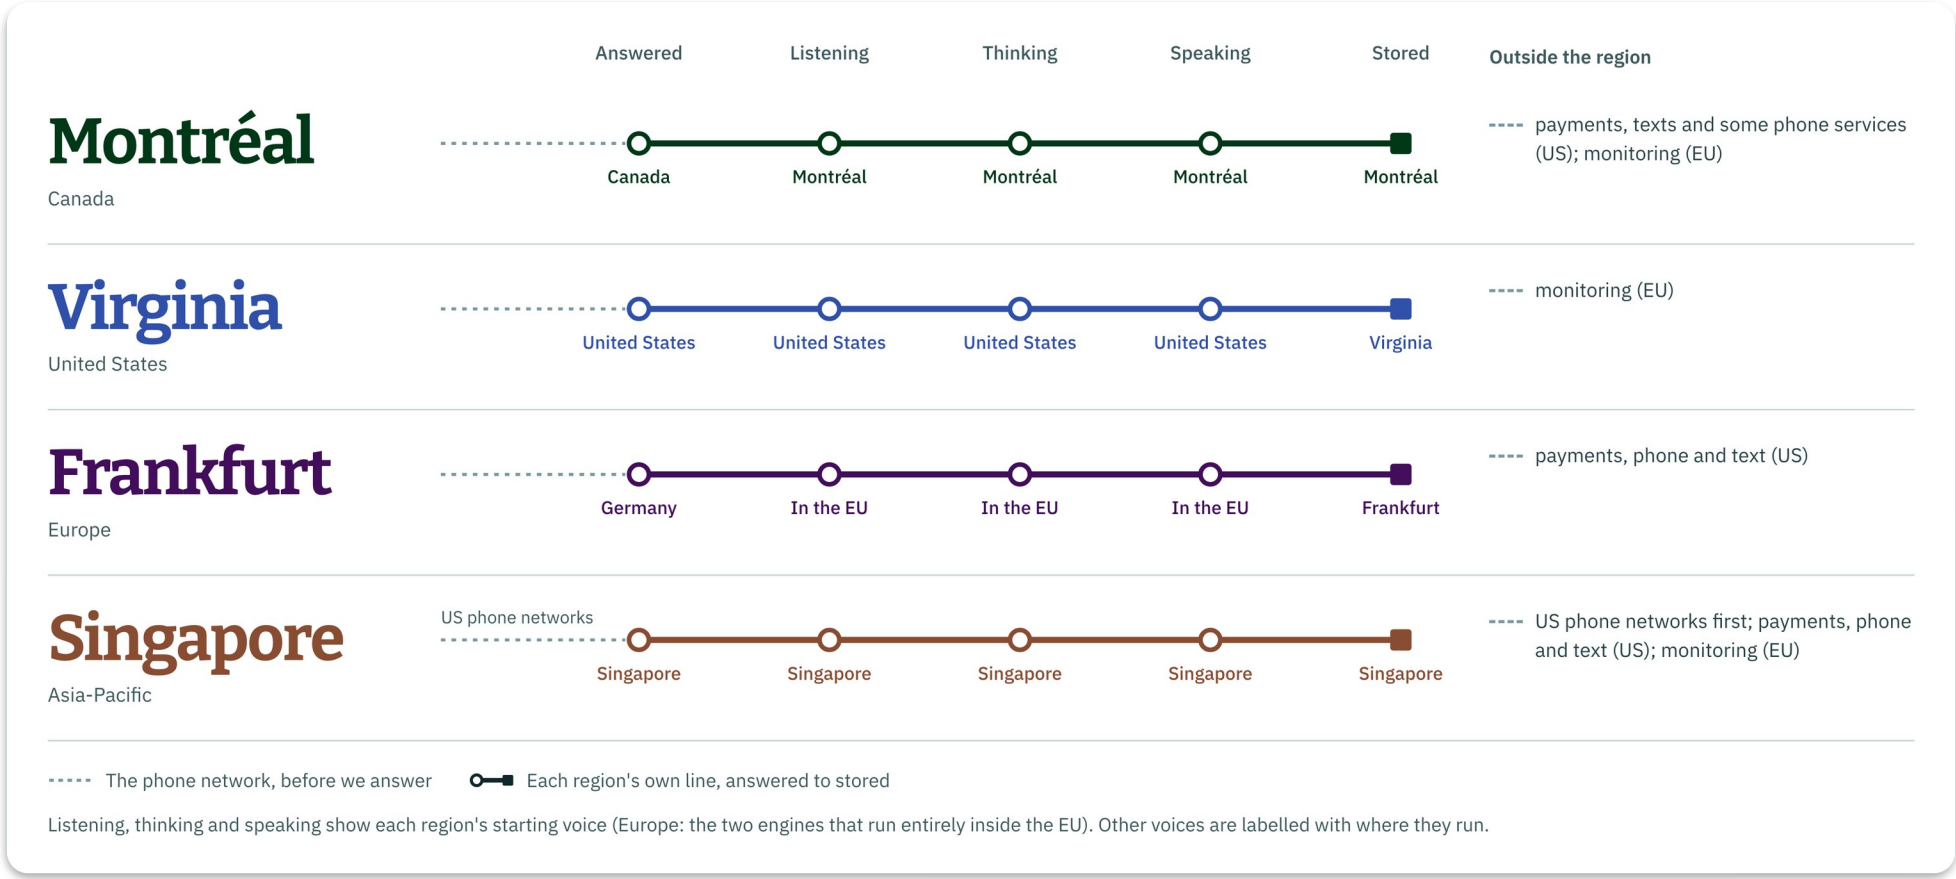

Distronode Corporation, Partner ID 7170087 · offer district-ai · multitenant SaaS
no Azure resources · nothing deployed in the customer's cloud or network

Residency and privacy

We never record a call.

We keep a transcript and a summary, not the audio.

How it compares

	Voicemail	Answering service	Generic AI voice bot	District AI
Answers every call, around the clock	Records a message	Depends on staffing and hours	✓	✓
Books on the customer's own Outlook calendar during the call	No	Usually a message to call back	Rarely tied to Microsoft 365	**Yes, through Microsoft Graph**
Transfers to a named person	No	✓	Varies	✓
English and Canadian French on the same line	No	Depends on staff	Varies	**Yes, plus four more languages**
Owner can listen in, whisper or take over live	No	No	Rarely	✓
Data region chosen by the customer, sub-processors published	n/a	Varies	Varies	**Yes, four regions**

How customers buy

1 

Marketplace purchase

Microsoft Marketplace, billed by Microsoft.

2 

Setup page

Choose the data region, sign in.

3 

Confirm Microsoft account

The Microsoft account behind the purchase.

4 

Microsoft 365 admin center

Change or cancel (CSP: through the partner).

Through a CSP partner. A partner in Microsoft's Cloud Solution Provider program sets the price, bills the customer and handles plan changes; Distronode provides the service and its support.

Four plans

Solo, Starter, Pro and Studio, each monthly or annual.

Overage

Billed per minute past the allowance, with an optional spending cap.
